

Experiment 10

Execute the following commands in Kali Linux Operating System:

`free, sort, history`

Aim

To execute and study the `free`, `sort`, and `history` commands in Kali Linux.

Procedure

1. Open the Kali Linux Terminal.
2. Execute the `free` command to display memory usage.
3. Execute the `sort` command to arrange lines of text in order.
4. Execute the `history` command to display previously executed commands.
5. Observe and record the output of each command.

```
user$ free -h
              total        used        free      shared  buff/cache   available
Mem:           3.8G        419.4M        3.2G         1.7M        178.5M        3.2G
Swap:              0              0              0

user$ free
              total        used        free      shared  buff/cache   available
Mem:         4007588        429656       3395136         1728        182796       3365532
Swap:              0              0              0

user$ echo -e "banana\napple\norange\ngrapes" > fruits.txt
user$ sort fruits.txt
apple
banana
grapes
orange

user$ history
user$ |
```

Result

Thus, the `free`, `sort`, and `history` commands were successfully executed and their results were displayed in Kali Linux.
