

Experiment 1

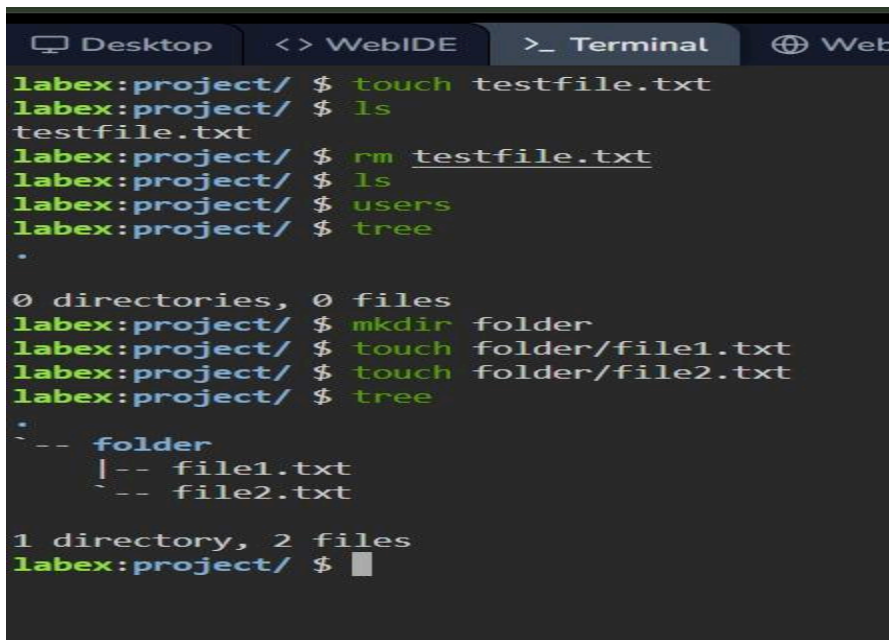

Execute and display the results for the following commands in Kali Linux Operating System: **rm**, **users**, **tree**

Aim

To execute and study the **rm**, **users**, and **tree** commands in Kali Linux.

Procedure

1. Open the Kali Linux Terminal.
2. Execute the **rm** command to remove a file.
3. Execute the **users** command to display the currently logged-in users.
4. Execute the **tree** command to display the directory structure.
5. Observe and record the output of each command.

```
labex:project/ $ touch testfile.txt
labex:project/ $ ls
testfile.txt
labex:project/ $ rm testfile.txt
labex:project/ $ ls
labex:project/ $ users
labex:project/ $ tree
.
0 directories, 0 files
labex:project/ $ mkdir folder
labex:project/ $ touch folder/file1.txt
labex:project/ $ touch folder/file2.txt
labex:project/ $ tree
.
|-- folder
|   |-- file1.txt
|   |-- file2.txt
1 directory, 2 files
labex:project/ $
```

Result

Thus, the **rm**, **users**, and **tree** commands were successfully executed and their results were displayed in Kali Linux.
