

Experiment 2

Execute and display the results for the following commands in Kali Linux Operating System:

`less, more, vi`

Aim

To execute and study the `less`, `more`, and `vi` commands in Kali Linux.

Procedure

1. Open the Kali Linux Terminal.
2. Create a sample text file.
3. Execute the `less` command to view the contents of the file page by page.
4. Execute the `more` command to view the file contents.
5. Execute the `vi` command to open and edit the file.

```
Welcome to WebTerm!
Type "help" to see available commands.
Type "tutorial" to select a tutorial.
Want the guided version? Open learn.webterm.app.
user@webterm:~$ echo "Linux is an operating system." > sample.txt
user@webterm:~$ echo "The less command displays files." >> sample.txt
user@webterm:~$ echo "The more command displays files." >> sample.txt
user@webterm:~$ cat sample.txt
Linux is an operating system.
The less command displays files.
The more command displays files.
user@webterm:~$ less sample.txt
user@webterm:~$ more sample.txt
Linux is an operating system.
The less command displays files.
The more command displays files.
user@webterm:~$ vi sample.txt
user@webterm:~$ █
```

Result

Thus, the `less`, `more`, and `vi` commands were successfully executed and their results were displayed in Kali Linux.
