

Experiment 4

Execute and display the results for the following commands in Kali Linux Operating System:

`ls, cat, mkdir`

Aim

To execute and study the `ls`, `cat`, and `mkdir` commands in Kali Linux.

Procedure

1. Open the Kali Linux Terminal.
2. Execute the `ls` command to list files and directories.
3. Execute the `cat` command to display the contents of a file.
4. Execute the `mkdir` command to create a new directory.
5. Observe and record the output.

```
user@webterm:~$ touch test.txt
user@webterm:~$ touch test1.txt
user@webterm:~$ ls
documents/  projects/  test.txt  test1.txt
user@webterm:~$ echo "this is 4th experiment" > test.txt
user@webterm:~$ cat test.txt
this is 4th experiment
user@webterm:~$ mkdir myfolder
user@webterm:~$ ls
documents/  myfolder/  projects/  test.txt  test1.txt
user@webterm:~$
```

Result

Thus, the `ls`, `cat`, and `mkdir` commands were successfully executed and their results were displayed in Kali Linux.
