

Experiment 5

Execute and display the results for the following commands in Kali Linux Operating System:

`uptime, date, mv`

Aim

To execute and study the `uptime`, `date`, and `mv` commands in Kali Linux.

Procedure

1. Open the Kali Linux Terminal.
2. Execute the `uptime` command to display the system running time.
3. Execute the `date` command to display the current date and time.
4. Execute the `mv` command to move or rename a file.
5. Observe and record the output.

```
user@webterm:~$ ls
documents/  projects/
user@webterm:~$ uptime
zsh: command not found: uptime
user@webterm:~$ date
Sat Oct  3 09:01:46 UTC 2026
user@webterm:~$ echo "this is experiment 5" > old.txt
user@webterm:~$ ls
documents/  old.txt  projects/
user@webterm:~$ mv old.txt new.txt
user@webterm:~$ ls
documents/  new.txt  projects/
user@webterm:~$
```

Result

Thus, the `uptime`, `date`, and `mv` commands were successfully executed and their results were displayed in Kali Linux.
