

Experiment 7

Execute and display the results for the following commands in Kali Linux Operating System:

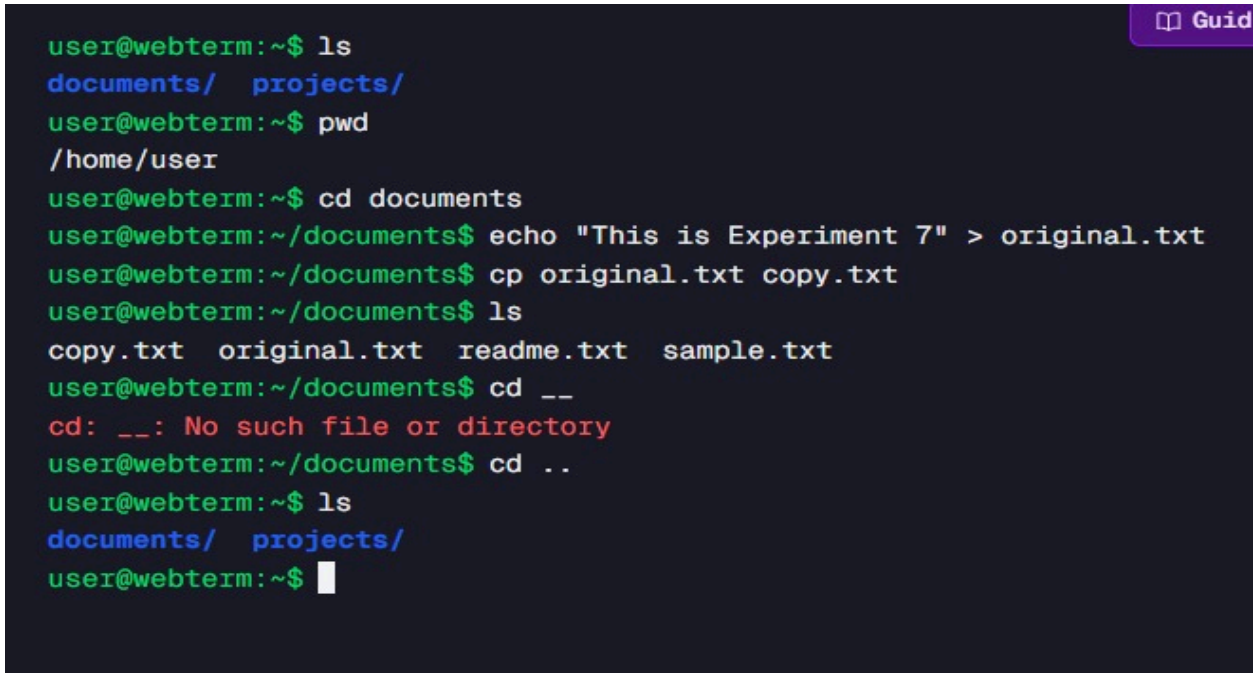

`cd, cp, ls`

Aim

To execute and study the `cd`, `cp`, and `ls` commands in Kali Linux.

Procedure

1. Open the Kali Linux Terminal.
2. Execute the `cd` command to change the current directory.
3. Execute the `cp` command to copy a file from one location to another.
4. Execute the `ls` command to list the files and directories.
5. Observe and record the output.

A screenshot of a Kali Linux terminal window. The terminal shows a series of commands and their outputs. The prompt is 'user@webterm:~\$'. The first command is 'ls', which outputs 'documents/' and 'projects/'. The second command is 'pwd', which outputs '/home/user'. The third command is 'cd documents', which changes the directory. The fourth command is 'echo "This is Experiment 7" > original.txt', which creates a file. The fifth command is 'cp original.txt copy.txt', which copies the file. The sixth command is 'ls', which outputs 'copy.txt', 'original.txt', 'readme.txt', and 'sample.txt'. The seventh command is 'cd __', which results in an error 'cd: __: No such file or directory'. The eighth command is 'cd ..', which changes the directory back to the home directory. The ninth command is 'ls', which outputs 'documents/' and 'projects/'. The prompt is 'user@webterm:~\$' with a cursor. A purple tab labeled 'Guid' is visible in the top right corner of the terminal window.

```
user@webterm:~$ ls
documents/  projects/
user@webterm:~$ pwd
/home/user
user@webterm:~$ cd documents
user@webterm:~/documents$ echo "This is Experiment 7" > original.txt
user@webterm:~/documents$ cp original.txt copy.txt
user@webterm:~/documents$ ls
copy.txt  original.txt  readme.txt  sample.txt
user@webterm:~/documents$ cd __
cd: __: No such file or directory
user@webterm:~/documents$ cd ..
user@webterm:~$ ls
documents/  projects/
user@webterm:~$
```

Result

Thus, the `cd`, `cp`, and `ls` commands were successfully executed and their results were displayed in Kali Linux.
